ANNUAL REPORT OF KVK UDALGURI, 2019-20

1. GENERAL INFORMATION ABOUT THE KVK

1.1. Name and address of KVK with phone, fax and e-mail

Address	Telephon	e	E mail
Krishi Vigyan Kendra, Udalguri	Office	FAX	kvk.udalguri13@gmail.com
Assam Agricultural University, Lalpool,	94353-48832	NIL	kvk_udalguri@aau.ac.in
784514, Assam			

1.2 . Name and address of host organization with phone, fax and e-mail

Address	Telep	ohone	E mail
	Office	FAX	vc@aau.ac.in, dee@aau.ac.in
Assam Agricultural	+91-376-	+91-376-	
University, Jorhat-785013	2340013	2340001	

1.3. Name of the Senior Scientist and Head with phone & mobile No

Name	Telephone / Contact					
	Residence	Mobile	Email			
Dr. Debasish Borah	-	94353- 48832	kvk.udalguri13@gmail.com			

1.4. Year of sanction: 2012

1.5. Staff Position (As on 31st March, 2020)

Sl.	Sanction ed post	Name of the incumben t	Designat ion	Discipli ne	Pay Band (Rs.)	Present basic (Rs.)	Date of joinin g	Perman ent /Temp orary	Category (SC/ST/ OBC/

1.8. A). Details SAC meeting* conducted in the year: The SAC meeting could not be conducted due to the pandemic situation of COVID-19. It was scheduled but had to be cancelled due to Covid 19 situation at the last moment

2. DETAILS OF DISTRICT

2.1 Major farming systems/enterprises (based on the analysis made by the KVK)

<u> </u>	2.1 Pajor larming systems, enterprises (basea on the analysis made by the hvir)						
Sl. No	Farming system/enterprises						
1.	Agriculture + A.H.						
2.	Agriculture + Fishery +A.H.						
3.	Agriculture +Horticulture +Sericulture						
4.	Agriculture +Horticulture +Fishery +A.H.						
5.	Agriculture +Horticulture +A.H.						

2.2 Description of major agro ecological situations (based on soil and topography)

No	Agro ecological situation	Characteristics
1	Foot hill with high	Foot hills of Himalayas, alluvial soils are found with dense
	elevation	forest
2	Upland medium rainfall	Old alluviums, acidic
3	Medium land medium rainfall	-
4	Low land low elevation	Near river banks, new alluvials which are either neutral or
		less acidic
5	Deep water low elevation	-

2.3 Soil type/s

Sl.	Soil type	Characteristics	Area in
No			ha
1.	Sandy loam	Dominated by sand particles, but contain enough clay and sediment	40560.16
2.	Clay loam	Susceptible to water logging, contain more clay than other type of rocks or mineral	45486.02
3.	Silty loam	Having greater tendency to form a crust, which is often very hard. If they are over tilled, they can become compact and this decreases their ability to infiltrate water in wet periods	1230.70
4.	Clay	Contain very little organic material, often need to add amendments. Clay are slowly permeability.	4355.10

2.4. Area, Production and Productivity of major crops cultivated in the district

Sl. No	Crop	Area (ha)	Production (MT)	Productivity (KG
				/ha)
1.	Rice (Total)	94657	1285220	1298.6
2.	Autumn Paddy	25642	24554	973
3.	Winter Paddy	63210	1244317	1997
4.	Summer Paddy	5805	16349	2816
5.	Jute	4516	47861	1908
6.	Potato	7544	43942	5825
7.	Rapeseed & Mustard	7036	1328	832
8.	Rabi Pulses	4164	5882	588
9.	Wheat	1066	1584	1466
10.	Sugarcane	790	31526 (In cane)	39907 (In cane)
11.	Maize	507	419	796
12.	Mesta	538	1908	784
13.	Banana	608	9333	15350
14.	Orange	740	8865	11980
15.	Chilli	452	294	650

2.5. Weather data

Month	Rainfall (mm)	Temperature ⁰ C		Relative Humidity (%)		
		Maximum	Minimum	Morning	Evening	
April, 2019	13.59	28.74	18.82	92.10	66.57	
May, 2019	18.37	28.14	20.46	94.16	76.94	
June, 2019	11.48	32.26	24.09	93.03	74.67	
July, 2019	13.25	40.47	24.09	92.87	80.68	
August, 2019	20.80	34.74	25.20	92.74	71.06	
September, 2019	13.14	31.69	23.41	95.37	76.97	
October, 2019	09.09	30.11	19.36	93.55	70.09	
November, 2019	03.33	28.75	15.79	93.70	62.90	
December, 2019	08.50	23.86	09.81	95.35	61.97	
January, 2020	08.00	22.09	08.23	94.03	59.74	
February, 2020	13.50	24.85	09.96	94.45	58.10	
March, 2020	02.10	29.04	15.26	87.81	53.16	

2.6. Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity	
Cattle				
Crossbred	7534	NA	NA	
Indigenous	227703	NA	NA

2.7 Details of Operational area / Villages (2019-20)

Sl. No	Tal uk/ Ele ka	Name of the block	Name of the village	Major crops & enterpr ises	Major problem identified	Identified thrust area
1		Kalaiga on	Kacharit al	Rice, rapesee d, cattle, fishery, piggery	1. Lack of knowledge of scientific cultivation of field and horticultural crops, livestock rearing 2. Lack of Awareness about new farm technologies 3. Lack of irrigation facilities 3. Marketing and transportation problem 4. Pest and disease incidence	Scientific cattle rearing for milk production, Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables
2		Kalaigo an	Ojhagao n	Rice, rapesee d, cattle, fishery, piggery	1.Lack of Awareness about improved farm technologies 2.Lack of irrigation facilities 3.Marketing and transportation problem 4.Pest and disease incidence	Rice-Fish farming &Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables
3		Dalgaon	Dewriga on	Rice, rapesee d, cattle, fishery, piggery, poultry	1.Lack of Awareness about improved farm technologies 2.Lack of irrigation facilities 3.Marketing and transportation problem 4.Pest and disease incidence 5. No improved breed of livestock/poultry is available	Small Scale livestock/poultry farming using improved breed
4		Dalgaon	Sarbahe rua	Rice, rapesee d, cattle, fishery, piggery	 Lack of Awareness about new farm technologies Lack of irrigation facilities Marketing and transportation problem Pest and disease incidence 	Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables,

5	Udal _i	gur Habigao n	Rice, rapesee d Vegetab les cattle, Poultry, Buffalo, Goat, Fishery	1.Lack of knowledge about scientific cultivation practices, IPM & IDM of field & vegetable crops 2.Transportaion problem 3. Lack of irrigation facilities 4.Pest and disease incidence	Livestock rearing & scientific cultivation practices of field crops
6	Bech ar		Rice, rapesee d, cattle, vegetabl es,	 High incidence of weeds in vegetables Judicious use of fertilizer Pest and disease attack 	Weed management in vegetables
7	Row	ta 2no. Botabar i	Rice, rapesee d, Vegetab les cattle, piggery	1.Lack of knowledge about scientific cultivation practices of vegetable 2.Transportation and marketing problem 3.Pest and disease incidence	Scientific cultivation practices of high valued vegetable crops
8	Row	ta Doifang	Rice, rapesee d, cattle, Citrus, vegetabl es, fishery, piggery	1.Pest and disease incidence specially in citrus 2.Farmers get less price for their produce 3.Transportation problem	Orchard management in citrus and study of marketing channels of different commodities
9	Kala on	-	Rice, rapesee d, cattle, fishery, piggery	1.Using traditional varieties of seeds 2.Improper utilization of fertilizer 3.Pest and disease problems in cereals	Scientific cultivation of cereals, oilseeds, vegetables
10	Bors	ola Sapkhai ti	Rice, rapesee d, cattle, fishery, piggery	1.Using traditional varieties of seeds 2.Improper utilization of fertilizer 3.Pest and disease problems in cereals	Scientific cultivation of cereals, oilseeds, vegetables

11	Kalaiga on	Kalbari	Rice, rapesee d, cattle, Orange, fishery, piggery	1.Pest and disease incidence specially in citrus 2.Farmers get less price for their produce 3.Transportation problem	Orchard management in citrus study of marketing channels of different commodities
12	Rowta	Jhargao n	Rice, rapesee d, vegetabl es, cattle, fishery, piggery	1.Lack of knowledge about scientific mushroom cultivation results low yield 2. Improper utilization of fertilizer 3.Pest and disease incidence 4. Improper management of Orange orchard	Scientific production technology of Mushroom
13	Kalaiga on	Kalaigao n	Rice, rapesee d, cattle, fishery, piggery	Lack of Awareness about new farm technologies Lack of irrigation facilities Marketing and transportation problem Pest and disease incidence	Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables
14	Dalgaon	Gerua	Rice, rapesee d, cattle, fishery, piggery	1.Lack of Awareness about new farm technologies 2.Lack of irrigation facilities 3. Marketing and transportation problem 4. Pest and disease incidence	Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables
15	Borsola	Goroim ari	Rice, rapesee d, cattle, fishery, piggery	 Lack of Awareness about new farm technologies Lack of irrigation facilities Marketing and transportation problem Pest and disease incidence 	Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables

16	Mazbat	Gelabil	Rice, rapesee d, cattle, fishery, piggery	1.Lack of Awareness about new farm technologies 2.Lack of irrigation facilities 3.Marketing and transportation problem 4. Pest and disease incidence	Scientific cultivation of cereals, oilseeds, pulses, fibre crops and vegetables
17	Pachim Mangal doi	Kuhiark uchi	Rice, rapesee d, Sugarca ne, Vegetab les cattle, fishery, piggery	1.Lack of knowledge about cultivation practices, livestock/poultry farming 2.Transportation and marketing problem 3.Pest and disease incidence	Small Scale piggery farming
18	Dalgaon	Simalug uri	Rice, rapesee d, Sericult ure, Vegetab les cattle, fishery, piggery	1.Lack of knowledge about cultivation practices, livestock/poultry farming 2. lack of exposure to market 3.Pest and disease incidence	Weaving in large scale
19	Bhergao n	Hirabari	Rice, rapesee d, Fishery, Vegetab les cattle, piggery	1.Lack of knowledge about scientific cultivation practices of field & vegetable crops 2.Lack of irrigation facilities 3.Pest and disease incidence	Scientific cultivation of cereals, oilseeds, pulses and vegetables
20	Rowta	Rowta Pathar	Rice, rapesee d, Vegetab les cattle, Fishery, Minor fruits, Pumpki	1.Lack of knowledge about scientific cultivation practices of field & vegetable crops 2.Lack of knowledge on orchard management of orange 3.Pest and disease incidence of Rice	Scientific orchard management and processing of minor fruits

21	Bhergao	Bhergao	Rice,	1.Poor transportation	Organic cultivation
	n	n	Vegetab les cattle, Fishery, Piggery	facilities 2. Lack of knowledge on scientific fish farming 3. Lack of knowledge on organic cultivation 3.Pest and disease incidence	& Scientific fish farming
22.	Rowta	Gersong	Rice, Vegetab les cattle, Fishery, Piggery	1.Poor transportation facilities 2. Lack of knowledge on scientific farming 3. Lack of knowledge on organic cultivation 3.Pest and disease incidence	Organic cultivation & Scientific farming
23.	Kalaiga on	Bhuyak hat	Rice, Vegetab les cattle, Fishery	1.Poor transportation facilities 2. Lack of knowledge on scientific farming 3. Lack of knowledge on organic cultivation 3.Pest and disease incidence	Organic cultivation & Scientific farming
24	Udalgur i	Bengbar i	Rice, Vegetab les cattle, Fishery	Poor transportation facilities 2. Lack of knowledge on scientific farming 3. Lack of knowledge on organic cultivation 3.Pest and disease incidence	Scientific cultivation of cereals, oilseeds, pulses and vegetables
25	Bhergao n	Chanbar i	Rice, Turmeri c, Toria, Blackpe pper, Pumkin	Poor transportation facilities 2. Lack of knowledge on scientific farming 3. Lack of knowledge on organic cultivation 3.Pest and disease incidence	Scientific cultivation of Rice, Turmeric, Toria, Blackpepper, Pumkin

A.5. Results of On Farm Testing

Sl. No	Title of OFT	Problem Diagnosed	Name of Technology Assessed	Crop/Crop ping system/ Enterprise	No. of Tria ls	Results of Assessment/ Refined (Data on the parameter should be provided)	Feedback from the farmer	Feedbac k to the Research er	B.C. Ratio
1	Introduct ion of high value crop dragon fruit in Udalguri District	Low income from locally available minor fruits	Spacing: 4m X 3m, Manuring: FYM @ 10-15 kg/plant, Fertilization: N @ 300g/plant and P ₂ O ₅ and K ₂ O @ 200 g/plant	Dragon fruit	03	Ongoing Crop is in vegetative stage (Plant height 8 feet)	Farmers are very much satisfied with the technology till date	Low cost technolog y for dragon fruit cultivatio n	-
2	Cultivatio n of high value crop Bhut Jolokia using organic sources of nutrients	Low income from inorganicall y produced Bhut Jolokia	Sowing Time: Jan-Feb. Seed rate: 115 g seed/ha (15g seeds/bigha) Spacing: 1.0 m X 0.75 m Fertilization: Compost @ 10 t/ha + Azospirillum + PSB, @ 1% + 1% Rock Phosphate	Bhut Jolokia	02	The trial is ongoing. Crop is at flower initiation stage (90 cm in height)	Farmers are very much satisfied with the technology till date	Need adequate organic inputs to meet the demand of farmers.	-

3	Performa	Chemical	1. Biofertilizers		03	Avg. Yiel	ld (q/ha.)	Farmers are	Need	Dem	Che
	nce of Sali Rice (Transpla nted) by using organic package	fertilizers causing environmen tal and health hazard and low income from chemically produced products	(Azospirillum and PSB) as seedling root dip treatment @ 4 kg/ha; 2.Enriched compost @ 5t/ha (Procedure: prime organic compost with biofertilizer consortia @ 1 % containing 108-109 cfu/g adjusted with 1 % Rock Phosphate (as P) and cure for 15-20 days); Variety: Ranjit sub-1			Demo 52	Check 41	satisfied with the technology till date	adequate quantity of organic inputs to meet the demand of farmers.	2.7	2.2
4	Replace	Low income	T1: Microbes	Ranjit	03	Avg. Yield (Farmers are	Need	Dem	Chec
	ment of Inorgani c Source of Potassic fertilizer	from chemically produced products and non-	(Azospirillum and PSB @ 4 kg/ha; Manure @ 1t/ha; Rock phosphate @ 10 kg/ha; KSB @			Demo 39	Check 42	very much satisfied with the technology till date	adequate quantity of organic inputs to meet the demand	2.41	2.18

	s by Potash Solubilizi ng Bacteria (KSB) in INM package of Rice	availability of complete organic package	3.5 kg /ha) T2: Check using INM (Microbes (Azospirillum and PSB @ 4 kg/ha; Manure @ 1t/ha; Rock phosphate @ 10 kg/ha; MOP @ 40 kg /ha) (var Ranjit)					of farmers.	
5	Quality assessme nt of value added products from oyster mushroo m	Less self life	T ₁ : mushroom biscuit T ₂ : mushroom pickle	mushroom	2	Acceptability level: T ₁ : 4.5 T ₂ : 4.2 Selling price: T ₁ : Rs. 380/1 kg T ₂ : Rs. 200/1 kg Storage period: T ₁ : 90 days T ₂ : 180 days	Farmers are highly satisfied	Good	Demo: T ₁ : 1.14 T ₂ : 1.33
6	Evaluatio n of Large White Yorkshir e pig for	Slow growth rate of the locally available pigs	Yorkshire is a prolific, exotic breed in India having capacity to grow upto 250-300 kg in Boar	piggery	5	Body weight (5 months) male= 22 kg Bodyweight female = 26kg Mortality 20 %	Farmers are very much satisfied with the growth performanc	Need adequate supply of good quality piglets.	Ongoing

	meat purpose	resulting low economic return	and Sow upto 200kg at maturity				e		
7	Producti ve performa nce of Turkey	slow growth rate of the existing local poultry birds.	Occupies important position of meat next to chicken. Reared under free range system with regular vaccination upto market weight of 16th to 18th weeks	Poultry	10	Avg. body weight at distribution (3 weeks)= avg. 330gm 6 weeks=avg. 900 gm 9 weeks= avg. 1350 gm	Newly introduced in the district	ongoing	Ongoing
8	Introduc tion of new pig breed HDK-75	Low growth rate of local breeds with low income	Pig breed HDK 75 has high mothering ability with good litter size and high body weight gain	Piggery	3	Avg. body weight male (13 months) = 67kg Avg. body weight female(13months) =87kg Avg. age at sexual maturity = 225 days Avg. age at onset of estrous=255days Avg. age at first conception=255 days Avg. Litter size at birth and weight=9.5 and 9.025kg	Farmers are very much satisfied with the performanc e of the breed	Need adequate supply of good quality piglets	ongoing
9	Introduc	emphasize	adaptable in wide	Rabbitry	4	No. of crops per doe per	Farmers are	Litter size	1.37

tion of Rabbit for Backyard system (Breed: Soviet Chincilla	production to enhance	condition, reproductive potential is very			year=5 crops Avg. age at first kindling =230days Avg. Litter size at birth=4nos Avg. Litter weight at birth=250gm Litter size at weaning =3nos Weaning weight at 8 weeks=870gm	reproductiv e performanc	at birth is not as per recomen dation	
10 Incorpor ation of Silver berb Barbony mus Gonionot us (bleeker) in feedbased carp polycultu re system with referenc e to seasonal	Specific Growth rate of IMC and Chinese carp is less than Silver barb	Stocking density is 25% of total by partial replacement of surface feeder fish	Silver berb	03	Date of Start: 17/07/2019 Avg. weight of Silver berb: 160 gm Fish Production: 3200 kg/ha Gross return: Rs. 4,80,000.00 Gross cost: Rs. 1,85,000.00 Net return: Rs. 2,95,000.00 BCR: 2.59	Farmers were satisfied with the growth parameters, Many more farmers are willing to adopt the technology	Good	2.59

	ponds								
11	Growth performa nce of Kawoi in paddy fields in rice-fish farming system	from monocultur e of rice	Stocking of Kawoi seed @ 10000 nos per ha. in low land paddy field after 7-10 days of transplantation of paddy		03	Date of Start: 09/08/2019 Size of Kawoi seed at stocking: Fry size Avg. weight of Kawoi: 80gm Fish Production: 760 kg/ha Rice production: 52q/ha Gross return: Rs. 3,03,400.00 Gross cost: Rs. 3,03,400.00 Net return: Rs. Rs. 2,06,400.00	Farmers were satisfied with the yield and technology	Good	3.13
12	Adaptati on and Improve ment of a Simple	Unhygienic, insect and dirt infestation	Drying of fish under Solar Tent Dryer	Dry fish	03	Dry fish= 1.125 kg from4 kg of fresh fish Gross return: Rs. 790.00	Farmers were satisfied with the yield and	Good	1.66

	Solar Tent Dryer to Enhance Fish Drying	in end product and laborious				Gross cost: Rs. 477.00 Net return: Rs. Rs. 313.00	technology	
13	Impact assessme nt of oilseeds and pulses introduce d through CFLD	To find out the strength of the technology and its impact	Extent of technology adoption, horizontal spread/area coverage of the technology, social and economic impact	-	60	Toria Green gram Field pea	B:C Before CFLD 1.2 1.6 1.64	After CFLD 1.4 2.12 2.21

^{*}Field crops – ton/ha, * for horticultural crops -= kg/t/ha, * milk and meat – litres or kg/animal, * for mushroom and vermicompost kg/unit area.

^{**} Give details of the technology assessed or refined and farmer's practice

3.2 Achievements of Frontline Demonstrations during 2019-20

a. Follow-up for results of FLDs implemented during previous years
List of technologies demonstrated during previous year and popularized during 2019-20 and recommended for large scale adoption in the district

Sl.	Crop/		Horizonta	l spread of tech	nology
No	Enterprise	Technology demonstrated	No. of villages	No. of farmers	Area in ha
1	Strawberry	Scientific cultivation of strawberry var. Sweet Charlie	2	12	1
2	Banana	Scientific cultivation of Banana cv. Malbhog	4	22	2.5

3.7 Success stories on horizontal spread of the technologies/Case studies, if any (two or three pages write-up on each case/ successes with suitable action photographs)

Usually most of the farmers in the district used to keep the field fallow to the next growing season of *rabi* vegetables. However, fraction of cultivated area was used for growing some traditional and old varieties of Blackgram & Greengram and they followed improper doses of fertilizers, no inter cultural operations and improper plant population measures resulting in low yield. Owing to the diverse agro climatic situations, Udalguri district of Assam is endowed with comparative advantage for growing pulse crops.

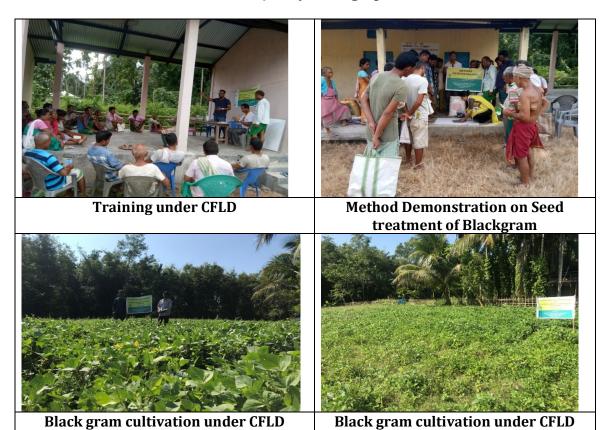

The Scientific cultivation of Blackgram using var. PU 31 (NPK@ 10:35:15; Compost @ 1 t/ha; Seed treatment with *Rhizobium* @ 50 g/kg of seeds) was demonstrated. Under the NFSM project a total of 10 ha of PU 31 were demonstrated in cluster basis in the year 2019-20. For the demonstration of the technology KVK has provided inputs like blackgram var. PU 31 along with the Rhizobium culture for seed treatment, vermicompost and plant protection chemicals. Regular services are also provided to the farmers to solve their day to day problems and have feedback and monitoring.

The average yield was 9.2 q/ha and the net return obtained from cultivating per ha of blackgram was Rs. 21500 with a B:C ratio 1.87. It was found that majority of the participant farmers in the programme had full adoption of improved practices viz., land preparation, use of high yielding varieties, sowing time and application of manures and fertilizers. The farmers have also packed the produce and will sell in the local market as seed for the next season. The area under this variety has now spread significantly covering a majority of (area approx. 20 ha) and expected to show further horizontal increase in the next season.

Performance of technology:

Specific Technology	\ 1 , ,	Gross cost (Rs/ha)	Gross income (Rs/ha)	Net income (Rs/ha	B:C ratio
Farmer practices	6.9	22350	34500	12150	1.54
Demonstration	9.2	24500	46000	21500	1.87
% Increase	33.33	-	-	-	-

Quality Photographs

3.8 Give details of innovative methodology/technology developed and used for Transfer of Technology during the year-

3.9 Give details of indigenous technology practiced by the farmers in the KVK operational area which can be considered for technology development (in detail with suitable photographs)

4.0. IMPACT

4.1. Impact of KVK activities (Not to be restricted for reporting period only):

Name of specific technology/skill	No. of	% of	Change in ir	ncome (Rs.)
transferred	participant	adopti	Before	After
	S	on	(Rs./Unit)	(Rs./Unit)
Integrated crop management of Pea using Var: Prakash	50	80%	14480/ha	27520/ha
Integrated fish cum livestock farming system	12	80%	140000/ha	266000/ha
Vermicompost production technology	20	70%	Nil	7885/bag
INM in Sali rice var. Ranjit	10	70	41500.00	49900.00
T- perch as resting sites for predatory insectivorous birds in rice fields as a component of IPM	3	60	16284.00	31090.00
Integrated weed management in Chilli (1. Pre emergence application of Pendimethalin @ 1.5kg/ha + hand weeding at 35DAT, 2. Garden hoeing at 20 & 40 DAT)	3	60	47120.00	72152.00

Popularization of HYV of turmeric var. Megha Turmeric-1	13	60	230400.00	372200.00
Introduction of improved breed Kamrupa	67	30	400/bird	635/bird
Introduction of improved breed Japanese quail	50	100%	-	250/bird
Production technology of Oyster mushroom	48	70	0	4270.00
Scientific species ratio and combination in composite fish farming	3	40	180000.00	383400.00

NB: Should be based on actual study, questionnaire/group discussion etc. with ex-participants.

4.2. Cases of large scale adoption

- 1. **IFS** has been popularized through training and FLD and more than 200 farmers adopted the same particularly in Bhergaon, Udalguri and Rowta area.
- 2. **Turmeric**: High yielding Turmeric var. Megha Turmeric-1 has been introduced in the district through trainings FLD, OFT, TSP and under NEH component programme by KVK, Udalguri. Day by day the variety is getting more popular among the farmers of the district. More than 120 ha of area is now under this variety of Turmeric. The KVK has taken many programmers with farmers of ABAD (FPC) for production of quality planting material of this variety organically. The FPC is also producing turmeric powder and selling it on their organic outlet at Tangla. Due to high yield, the farmers of the Udalguri district are adopting the variety quickly. The crop and the variety is getting more popularity among the tribal farmers of the district.
- 3. **Cultivation of Rice followed by Toria –** due to use of long duration rice varieties and various other problems farmers generally grow rice as monocropping. KVK has introduced late sown toria variety TS 46, TS-47 etc through OFT, FLD, CFLDs,

- which can be grown after harvesting long duration rice and the technology is adopted on large scale basis. About 300 plus hacters is covered under the technology of Rice (Kharif) followed by toria.
- **4. Vermicomposting as enterprise** Vermicomposting has been popularized in large scale basis through trainings, FLD and TSP demonstrations. Presently about 30 farmers of village Nalkhamra has established a unit named as and they are selling the products. Hundreds of farmers of different part of the district has already started vermicomposting. It also boost up organic cultivation in the district.
- 4.3 Details of impact analysis of KVK activities carried out during the reporting period
